WHAT IS WHITE LITHIUM?

White lithium grease is the ultimate temperature and weather resistant heavy-duty lubricant. It is especially useful in places where there is metal-to-metal friction: car door hinges, garage door rails, springs and any other location where this quality of grease is needed.

The heavy-duty formula sprays on evenly as a liquid and sets dry for a thick protective coating. It's perfect for do-it-yourself around the home maintenance and protection.

White lithium grease is high quality, lithium-based grease. It is the ultimate weather resistant heavy-duty lubricant. Just spray the high performance, temperature resistant lubricant where it is needed.

White lithium grease is especially useful for metal-to-metal friction like hinges, car door hinges, garage door rails, springs, and any other location where grease is needed.

The heavy-duty formula sprays on evenly as a liquid and sets dry for a thick protective coating that will not melt, run, wash off or freeze. It can be used on items that will have extended contact with water and need friction reduction.

Lubricates:

- brake cables
- nautical equipment
- outboard motors
- rudders
- and more.

Fights rust and corrosion on:

- vehicle hinges
- hitching attachment
- snow blowers
- and any metal part that moves and is exposed to water for periods of time.

Addresses the lubrication requirements for:

- hood and trunk hinges and springs
- seat and ash tray tracks
- door latches
- gear shift mechanism
- steering linkages
- jacks
- winches
- garden tools
- garage door tracks
- bicycle chains
- sporting goods
- snowmobiles
- outboard motor pivot points

Control cables and trailer rollers all work better by using white lithium grease.

White lithium grease protects and lubricates in temperatures ranging from -45°C to 175°C

Does not damage plastic, glass, rubber or metal.

For professionals since 1958

Directions for use:

- Shake can very well before using.
- Apply to points or surfaces to be lubricated.
- Avoid excess.
- For hard to reach areas or to pinpoint a spot, use extension tube.

Model JIG1101
Net weight: 10.9 oz. (311 g)

SAMPLE OF JIG-A-LOO USES

USE N°20
Cleans and protects trailer hitch locking mechanism

USE N°106
Keeps truck bed anchors rust free

USE N°98
Keeps cable on spare tire rack from seizing

USE N°121
Lubricates auto hood latch

USE N°104
Keeps tire jack working smoothly

USE N°105
Keeps transmission linkages operating smoothly
